

COLOCATION CABINET CYBERACK COLO SERIES

COLOCATION RACK

The Cyberack Colocation series provides an excellent solution for a specialized application. Data centers that offer colocation facilities appreciate our secure and highly versatile design.

Available in 2, 3 or 4 compartment configurations, our Colo rack provides complete integrity between compartments, plus optimized cable and air management.

FEATURES

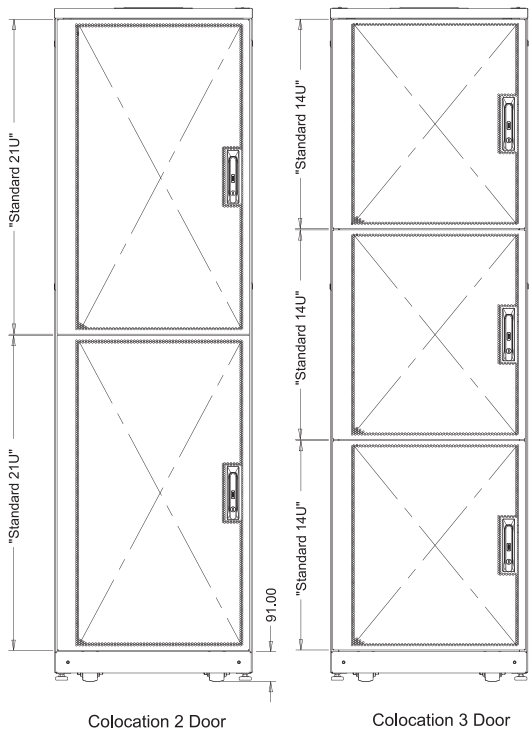

Optional

- User settable 3 digit combination locks on each door
- Field reversible doors with 135 degree opening radius
- Sealed cable channels accessible only to individual user
- Depth adjustable 19" mounting rails
- High density perforated doors with provision to mount fan on rear door
- Optional security panel replaces standard side panel when two or more cabinets are bayed together
